cosmetic skin rejuvenation

# OUR SERVICES

## Cynosure Laser Hair Removal

- The Vectus™ Laser is the intelligent choice, providing the fastest and most effective treatment for unwanted hair removal. With light-based hair removal, you can get the touchable skin you've always wanted. All you need is a few simple treatments to get lasting results. The secret lies in the technology that targets and destroys hair cells responsible for hair growth. This treatment is fast, easy and practically pain free.

## Smart Lipo

- The tumescent technique may be the reason liposuction is the number one surgical cosmetic surgery in the United States. It not only tightens your skin, but destroys fat cells, improves your overall body shape and gets you back to work in a couple of days.

## Infrared Sauna

- Infrared is a naturally occurring output of the sun, but does not contain the harmful UV rays associated with unprotected sunlight. Solocarbon® is Sunlighten's proprietary far infrared technology is the only heater on the market clinically shown to raise core temperature, lower blood pressure and aid in weight loss.

## Non - Invasive Fat Removal with Vanquish

- Vanquish Fat Removal is the newest state of the art, non-invasive procedure that eliminates unwanted "belly" fat using Safe RF Technology to destroy the fat cells. Vanquish destroys those stubborn fat cells without harming the skin or surrounding muscle. With the largest spot size in the industry, it treats flank to flank in one session.

## Vaginal Rejuvenation with Geneveve

- This clinically proven and innovative treatment option employs cryogen-cooled monopolar radiofrequency to produce healthy collagen and a revived sensation of feminine wellness. It helps women looking to improve post-childbirth vaginal laxity, decrease incontinence and heighten sensation during sex. Women will obtain the long-lasting results they desire. We are proud to become one of the first vConfidence certified providers to offer the Geneveve treatment.

## Skin Rejuvenation Treatments

- As you age your skin loses its elasticity. We offer multiple solutions to get your skin looking its best. Custom chemical peels remove the damaged outer layers of skin that cause acne and uneven skin tone. Microdermabrasion is a dry exfoliation method that removes dead skin cells. We also offer IPL, which is a laser that can be customized to each patient's needs and concerns. This can help with dark spots and help reverse the signs of aging, giving you back the skin you deserve.

## Botox

- Botox and Dysport are prescription medications that temporarily improve the appearance of moderate to severe frown lines between your brows, on your forehead and around your eyes. Botox blocks signals from the nerves to the muscles. The injected muscle can no longer contract, which causes the wrinkles to relax and soften.
