Tired of constantly shaving and waxing unwanted facial and body hair?

With light-based hair removal you can get the touchable skin you've always wanted. All you need is a few simple treatments to get lasting results. The secret lies in the technology that targets and destroys hair cells responsible for hair growth without harming the surrounding skin. This treatment is fast, easy and practically pain free.

How does it work?

Energy is used to target and destroy hair follicles responsible for hair growth without causing damage to the surrounding skin.

What results can I expect?

You can expect to see a gradual decrease in hair thickness and the amount of hair in the area*. Since this treatment only targets hair in the active phase of growth, multiple treatments are often needed for complete removal.

Treatment plans can be adjusted to fit everyone's lifestyle – speak to your provider regarding desired downtime, comfort, and results.

Schedule your treatment session today.

*Individual results may vary and are not guaranteed.
